

S Series Solution Tanks

Compact Systems for Chemical Injection

S Series solution tanks combine the pump with a tank unit to offer large capacity in a space-saving design. They are easy to install; simply connect the piping and power supply to begin operation. Available in three sizes. Optional accessories include a float switch, spare lid, and drain valve.

30L (7.9 gal)

50L (13.2 gal)

120L (31.7 gal)

Float Switch

Will stop the pump and sound an alarm when the remaining volume of chemical liquid in the solution tank becomes low. Available in one-point and two-point type sensors.

Tank Lid

Spare tank lids are available. One size fits all three solution tank models.

Drain Valve

Drains the excess moisture from the system.
